PROFESSIONAL SUMMARY

A dedicated and adaptable Front-End Developer, UI/UX Designer, and WordPress Developer holding a Bachelor's in Computer Science (Graphics and Multimedia) with honours. Experienced in designing wireframes and prototypes in Figma, building mobile and web interfaces with Flutter, Laravel, HTML/CSS, and managing enterprise web portals via WordPress. Skilled in conducting User Acceptance Testing (UAT), mapping user workflows, and creating structured system documentation. Eager to contribute effectively to a role that offers opportunities for industry growth, with a commitment to supporting organizational goals while advancing professional development.

CORE SKILLS

- UI/UX Design: Figma, User Flow Architecture, Wireframing, UI Prototyping, Responsive Design, Canva.
- Front-End & Web Development: HTML, CSS, JavaScript, Flutter, Dart, WordPress CMS, AJAX.
- Back-End & Database: Laravel, MySQL, SQL, PHP.
- Software, QA & Tools: User Acceptance Testing (UAT), System Testing, Git, VS Code, Power BI.

WORK EXPERIENCE

IT / Software Engineering Intern

Favotech System Sdn. Bhd., Cyberjaya - September 2025 – February 2026

- Full-Stack Mobile App Development: Developed an internal mobile application (i-Cadang) end-to-end, engineering the front-end using Flutter and integrating back-end services using Laravel.
- UI/UX Design & Prototyping: Wireframed and prototyped intuitive user interfaces and navigation flows in Figma for mobile and web systems, including the Skuad Antidadah app and iPersonel system.
- WordPress Portal Management: Designed and maintained web layouts, custom posts, homepage statistics, and navigation modules for the KPK Government Portal and corporate website using WordPress.
- Quality Assurance & Testing: Performed System Testing and User Acceptance Testing (UAT) across 8 enterprise applications (JIMS, iParlimen, eVehicle, MYASA, EMMKN), creating formal FATMS test scripts and logging structured bug reports.
- System Documentation: Authored and updated system documentation (D02–D17), designing workflow diagrams, use-case diagrams, and database structure models.
- AI Training Facilitator: Assisted corporate clients in hands-on workshops navigating AI tools including Gemini and NotebookLM.

EDUCATION

Universiti Teknologi Malaysia – Johor, Malaysia

Bachelor of Computer Science (Graphics and Multimedia Software) With Honours

Expected Graduation: November 2026

Relevant Coursework: Web Programming, Data Structure, Programming Technique, Database Systems, Application Development, Real-Time Computer Graphics, Artificial Intelligence

CGPA: 3.82

Key Projects:

Web-Based Leave Application & Management System

- Developed a web application integrated with a MySQL database to manage leave applications and approvals. Utilized HTML for front-end design and MySQL for database management, ensuring an efficient and reliable system for both employees and administrators.

Mobile App for Car Rental Service

- Created a mobile application using Flutter and Dart, tailored for a car rental service company, exclusively for student users. Focused on user-friendly design and seamless functionality to manage car reservations and rentals.

Mobile Application for Lab Attendance and Appointment System

- Developed a mobile application using Flutter and Dart that integrates geolocation to accurately track users' current location for reliable attendance marking. Designed to streamline lab appointment scheduling and attendance tracking with intuitive user experience.

Extracurricular Experience:

Booth Coordinator and Presenter, Community Engagement Showcase and Co curriculum Carnival

Universiti Teknologi Malaysia – December 2023 –January 2024

- Led booth decoration and set up to create an engaging and visually appealing display that attracted visitors.
- Presented services and project developments to attendees, effectively communicating goals and impact.
- Managed media exposure, promoting the event and services both online and through in-person engagement to broaden outreach.
- Collaborated with team members to ensure cohesive presentation and audience engagement, enhancing visibility and participation.

Facilitator and Marketing Team Member, Graphics and Multimedia Showcase and Workshop

Universiti Teknologi Malaysia – April 2026 –June 2026

- Served as Facilitator for Augmented Reality (AR) workshops, guiding participants step-by-step through interactive hands-on sessions to ensure seamless learning.
- Brainstormed creative promotional ideas, shot video footage, and edited engaging multimedia content to maximize event reach and visibility.
- Managed content distribution and social media blasts across multiple platforms to boost audience engagement and drive event participation.
